A Late-Summer Anthem for Lost Love: Singer-Songwriter Bradley Cole Reimagines Fan-Favorite Single "On A Summer Night"

LAS VEGAS, NV — August 16, 2026. As the lingering heat of August gives way to cool late-summer evenings, singer-songwriter Bradley Cole returns with a new, refreshed recording of his signature ballad, **"On A Summer Night."**

A timeless tale of passion, timing, and sudden clarity, "On A Summer Night" traces the bittersweet journey of finding true love, letting it slip through your fingers, and suffering the sudden, haunting realization that they were "the one" all along. Built around acoustic and electric guitars and cinematic storytelling, the track blends Americana authenticity with the classic beat of Pop Rock.

While the original cut was straightforward with Bradley singing lead, playing guitars and bass with a drummer in New York, Cole returned to the studio to fully realize the track's dynamic potential. In an era dominated by "A.I." production, Cole took a hands-on "human" approach—personally tracking every acoustic guitar, bassline, musette, keyboards, and rich vocal layers himself in his home studio. To give the song its unmistakable pulse, he looked beyond his own studio, collaborating with a session drummer, and recording engineers and mixers in Rio de Janeiro, Brazil. The result gives the song live percussion that breathes life into the track's driving rhythm.

"Some songs demand to be lived in before they are truly finished," says Cole. "This track has always been near and dear to my heart. Re-recording it allowed me to capture the exact feeling of those romantic dreamlike memories—the regret, the nostalgia, and the urge to turn back the clock."

With its lush vocal harmonies, evocative lyrics, and a hook tailored for late-night drives—the musette plays a line that is an earworm—the newly mixed and mastered version of "On A Summer Night" serves as the definitive seasonal soundtrack for dreamers and lovers alike.

"On A Summer Night" is available Friday, August 21st on **Spotify**, Apple Music, YouTube, and all major digital streaming platforms.
